

Equipment Division – Objectives

1. Project Support & Equipment Availability

Ensure timely availability of all required equipment to meet project demands without delays or disruptions.

2. Optimal Asset Utilization

Maximize utilization of all company-owned equipment through effective deployment in internal projects and external rental opportunities.

3. Operational Efficiency & Cost Control

Reduce idle time, maintenance cost, and operational inefficiencies through planned scheduling, preventive maintenance, and monitoring systems.

4. Safety & Compliance

Maintain zero-incident operations by enforcing strict safety standards, compliance procedures, and regular inspections.

5. Reliability & Equipment Performance

Ensure all equipment is maintained in high working condition with minimal breakdowns through structured maintenance strategies.

6. Continuous Improvement & Innovation

Implement modern fleet and equipment management practices, digital tracking systems, and performance analytics to improve efficiency and decision-making.

7. Profitability Contribution

Transform the Equipment Division into a profit-generating unit by balancing internal support with external revenue opportunities.
